DALY-JUDGE MILL CHANGES

Plant Is Now Being Rearranged and Enlarged.

W. NEILL ON BINGHAM,

TELLS EASTERNERS WHAT FA-MOUS OLD CAMP IS DOING.

While an average of two carloads a INVESTORS WANT PROSPECTS. W. H. Child of This City Said to day of crude ore is being sent to mar-

with mark enters, rolls, screens, elevators, conveyors, Huntingtons, tables and the like, and to make them do their work acceptably and to their full capacity is Mr. Sherman's mission, a work that is now well under way, or at least that is what one would surmise from the men appropriate and the base amount of the men appropriate and the second of the men appropriate and the men appro

the addition to completion. ing & Development his addition will receive a set of Boston. He says: "This addition will receive a set of leven Sherman slime settling and classifying tanks. These tanks are the invention of Superintendent Sherman, for which a patent is now pending. This series of tanks is for the treatment of ore that is strong enough to stay in suspension under a strong current of water. The first one is of 440 gallons capacity, which capacity is doubled up with each tank, so the last one will hold 28.372 gallons. All these tanks are twelve feet deep and their total capacity is 56.095 gallons.

"This mine is just like a big manustring concern. Its production of 500 tons per day, averaging 6 per cent copper, is maintained without depleting its ore reserves, in fact the reserves are being added to all the time. "The Boston Consolidated is rapidly 28.372 gallons.

"The Bingham camp never looked is the better. The general favorite is the Highland Boy (Utah Consolidated). This mine is just like a big manustrip concern. Its production of 500 tons per day, averaging 6 per cent copper, is maintained without depleting its ore reserves, in fact the reserves are being added to all the time. "The Boston Consolidated is rapidly coming to the front with new discoveries at greater depths. Let it be understood that these discoveries and ore bodies are in the limestone formation as are those of the Highland Boy, and are very different from those in the porphyry which were first exploited in connection with the Boston Consolidated.

"The Bingham camp never looked is the thing hand as part like a big main is just like

o mill men.

"One more five-foot Huntington mill s to be added to the plant, another three-compartment New Centric," drop of the district. The erection of a remotion jig, making a total of six of these jigs in the mill, three more Wilfly tables, making a total of nineteen tables, a centrifugal pump, probably temporary, has been put in to handle or throw the zinc product out on the dump."

SAW

Southern and Company is outhern and Component of the district. The erection of a reduction works to handle the Boston Consolidated product must naturally follow.

"Opposite the Highland Boy and Boston Consolidated are the workings of the Yampa mine belonging to the Tintig Mining & Development company. In the lower tunnel the company has the limestone formation at a depth of

Money Market Getting Easier and Outlook Is Better.

achange for the better that cannot fall to make operators on this end of the line breathe a little easier:

"The most characteristic feature of the market at the present time is the ultra-conservatism of the public, both speculative and investment. In the budgment of one of the principal banking interests this is the reason why, after a long and serious decline, the market is relatively slow to raily in spite of what is admitted to be a very large short interest outstanding. Liquidation has undoubtedly ceased in large measure, as is evidenced by the fact that the market is extremely dull. Yet so far there has been no disposition to gaily to any large short interest outstanding. Liquidation has undoubtedly ceased in large measure, as is evidenced by the fact that the market is extremely dull. Yet so far there has been no disposition to gaily to any large extent.

"The next thirty days are, however, likely to bring somewhat of a change in the general sentiment. The first crop report of the season will be published tomorrow afternoon. It will give the condition of winter wheat as of April and it is known in advance that this condition will be the best ever recorded and upon the Jargest acreage. Crop conditions, in fact, are ideal over the entire winter wheat and corn bett as the country has had a precipitation of moisture the largest in a long while. The money market is now easing under the influence of returning funds and diminishing loans. This tendency can hardly fall to continue for something like ninety days, during which time hand reverse at this center should materially increase. In July, will probably fall the payments for the Panna canal, all of which will be taken from the treasury as already stated. The course of railroad earnings is such that with two or three notable exceptions, not in the course of returning funds and diminishing loans. This tendency can plant the payments for the Panna canal canada canada canada course of the cour treasury as already stated. The course of railroad earnings is such that with two or three notable exceptions, net increases will be the rule from now to gether the combination is a magnificant the close of the fiscal year. The ratio or railroad earnings is such that with the crosses will be the rule from now to the close of the fiscal year. The ratio of increase in gross earnings is practically the largest in many months. The records of foreign trade for the month of March will be available in a few days. The probability is that they will show an increase in the excess of exports over imports as compared with a year ago. Finally, the growing disposition of European investors to purchase our securities is a feature of the situation making for strength.

"Altogether, it must be said that the encouraging factors in the position outnot neglected and of the property. The principal element of uncertainty appears to be the National Scurities decision which most people now believe will be adverse to the company."

PARK MINING NOTES.

Ore Shipments—Woodside Lease—Other Items.

(Park Record.)

There is rumor of an approaching consolidation of properties of this district that wasterstailizes.

(Park Record.)

There is rumor of an approaching consolidation of properties of this district that will create something of a sensation if its materializes.

B. B. Flack, an expert electrician, is more as a sensation of the properties of the properties.

Quincy and Little Bell mines. The work is being done strictly according to the code, and is a very valuable improvement. Mr. Flack is now on the regular nayroll of the Daly-West as electrician, charles Gitsch, who has a lease on the Woodside, will put three men at work in the old tunnel Monday. Second-class ores will be taken our and jigged for the present. The force will be enlarged as things shape themselves, and before the number is out the old Woodside is likely to hum again.

The Silver King aerial tram was sup-

pited with a new cable the first of the cable used up in the transmission of ore from the mine to the terminal, but this wear and tear is all from hard service, and means that dollars have gone over it for every mill's worth of damage.

Mamager John J. Daly of the great Daly-Judge came up yesterday accompanied by Secretary Lambourne. Mr. Daly came up to review the many changes and improvements made during his enforced absence, and is well pleased with the condition of things, both in mine and the ulans outlined for the new mill work. Ore from the mine is being steadily shipped at the rate of a little better than two cars a day. We are glad, also, to state that Mr. Daly's health is much improved.

good management but what a mine wine be developed.

Work will be started with a force of men immediately to fun a tunnel to tap the vein at death. This is an excellent tunnel proposition, as for every 100 feet driven, a depth of fifty feet is gained, thus saving all expenses for heavy machinery that would be necessary if a shaft had to be sunk.

A most important mining deal has been put through by William H. Child of Sait Lake and we will see great activity at the Humboldt house this summer. (Boston News Bureau.) James W. Neill of Salt Lake City, At the north end of the min a good force of men is at work excavating for an addition to be 261/2x95 feet in dimensions. Three shifts of eight hours each are employed on the grade and next week the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be busily engaged in pushing the stone masous and carpenters will be stone masous and carpenters will be stone masous and carpenters will be stone masous and carpent Amount and Character of Ore in New ing & Development company, is in

Workings on 400 Level.

The strike reported on the 400 level of the Victor Consolidated a few days ago is thus described by the Tintic Miner:

"A new body of ore has been opened on the 400-foot level of the Victor Consolidated. The drift, which is four feet wide, shows an entire face of copper that carries 14 per cent, thirteen ounces silver and \$1 in gold. As yet the extent of the stope has not been determined. It is 500 feet south of the stope on the 300 level that extends almost to the surface, giving a stoping area of 500 feet in length and 100 feet vertically, and bids fair to open into a big body of first-class ore. The company is sending out about a carload a day since the roads improved, and expects to increase that tonnage as soon as stoping begins on the 400 level."

as high a saving from the slimes om any other product of the mill; elir great value is at once apparent in the Boston Consolidated would seem to prove the continuation of the ore zone on the southern and eastern side of the can-

the limestone formation at a depth of 1,800 feet below its apex and has there found the ore bodies intact and of similar or better grades than found on the

Outlook Is Better.

The following resume of the financial ituation, as viewed by the Wall Street ournal of Thursday last, shows a hange for the better that cannot fall o make operators on this end of the contact ore bodies to greater depth than ever before developed. Sink-

runner of Future Baldness.

That such is the case has been conclusively proven by scientific researche. Prof. Unna, the noted European skin specialist, declares that dandruff is the burrowed-up cuticle of the scalp, caused by parasites destroying the vitality in the hair bulb. The hair becomes lifeless, and, in time, falls out. This can be prevented. Newbor's Herpicide kills this dandruff germ, and restores the hair to its natural softness and abundancy.

Herpicide is now used by thousands of people—all satisfied that it is the most wonderful hair preparation on the market today. Sold by leading druggists, Send 19c in stamps for sample to the Herpicide Co., Detroit, Mich.

mer. "Indications point to the equipment during the present season of the Wall-De Lamar group with a concentrator of large capacity. This proposition is in the porphyry and the successful treatment of this material, which car-ries about forty pounds of copper to the ton, would mean the opening up of a larger copper production in the cam than it has heretofore known, as it FREE

Stocks that are Worth Buying

Are those now paying dividends or about to begin. A mine that has been worked for years and has never made any money for its shareholders is a discouraging proposition. Of course, it takes a little time to develop a mine, but if it is not developed with three years' steady work, begin to get your money out and put it somewhere else. You will find this a good rule. There may be exceptions, but people that hunt the exceptions, and hunt then hard, will go broke before they find them. There are plenty of good investments, including these: Daly-West, Naildriver, Sacramento, Park Summit, and as a speculation, "Aristocrat" of Park City at 4½ cents a share. I have got it.

N. A. PAGE, Walker Bank Building.
